

High School Course Catalog

2018 - 2019

EDUPRIZE High School Vision Statement

Our vision is to be a community of internationally minded thinkers who acquire knowledge and understanding via inquiry and reflection, who lead balanced lives and care for others, who listen with open minds and take risks while maintaining principles, and who communicate and collaborate effectively.

Welcome to EDUPRIZE High School!

This Course Catalog has been prepared to assist students in selecting courses for next year. We offer a wide variety of diverse, challenging learning opportunities. Planning a high school program to meet your unique needs is a process involving many choices and decisions. Your success is important to us and the following suggestions may help you in this process:

- Discuss your plans with your family, counselor and teachers as they can provide valuable insight.
- Select courses that will meet district and state graduation requirements as well as support future educational and career goals.
- Participate in courses designed to satisfy current interests, curiosity and the development of personal skills.
- Employ as many resources within the school as necessary to assist you in planning an effective overall educational program.

As part of our ongoing commitment to provide a high quality education, we expect students to:

1. Invest their best efforts in their academic and extracurricular activities;
2. Accept responsibility for their learning, decisions and actions;
3. Treat staff and each other with respect.

We are proud and excited to have you as a part of EDUPRIZE High School!

Table of Contents

General Information	03
International Baccalaureate Diploma Programme	05
Primary Language: English	06
Second Language Acquisition	10
Social Sciences	12
Natural Science & Technology	14
Mathematics	19
Fine/Practical Arts	23
Theory of Knowledge	28
Physical Education	28
Electives	29

General Information

EDUPRIZE High School students follow a block schedule Tuesday - Thursday. This schedule provides numerous opportunities for students to take a variety of classes while still meeting both district and state graduation requirements. Our school day is divided into four blocks with each block being approximately 95 minutes in length. On Mondays, students follow a typical 8 period school day, classes are approximately 45 minutes in length. On Fridays, students follow a shortened day of 4 class periods, each being 1 hour in length. The school day is dismissed at 12, noon on Fridays. Our school year is divided into 4 grading quarters. High school credit is earned at the conclusion of final examinations of quarters 2 and 4.

The final semester grade is calculated as follows in grades 9-12: Q1 or Q3 (40%) Q2 or Q4 (40%) final exam (20%)

To earn an EDUPRIZE High School diploma, students must complete the following requirements and complete their individualized ECAP:

EDUPRIZE High School Graduation Requirements

Curriculum	IB	Academic +	Academic
English	4	4	4
Math	4	4	4
Science	4	4	4
Social Studies	4	3	3
TOK	1	1	0
Foreign Language	2	2	1
Fine/Practical Arts	2	2	2
Technology	0.5	0.5	0.5
Elective	2.5	3.5	5.5
TOTAL	24	24	24

Students who are seeking enrollment in a 4-year Arizona public university after High School, should plan their high school courses as what is outlined below to satisfy these requirements, in addition to college entrance exam requirements:

Arizona Public University Admission Criteria

Curriculum	Credits
English	4
Math	4
Science	3
Social Studies (Inc AZ History)	2
Foreign Language (same language)	2
Fine Arts/Vocational Education	1

ECAP

On February 25, 2008 the Arizona State Board of Education approved Education and Career Action Plans for all Arizona students grades 9-12. An ECAP (Education and Career Action Plan) reflects a student’s current plan of coursework, career aspirations, and extended learning opportunities in order to develop the student’s individual academic, career goals and postsecondary plans.

Credit Recovery

Students who are unable to successfully complete all their course work should work with their counselor to develop individualized plans to recover credits to earn their diploma on-time.

Dual Enrollment

Are you a high school student looking to get ahead? Rio Salado College is looking for able and ambitious students that are interested in earning college credits - all while still in high school. Please see your counselor for additional information and how to register.

EVIT (East Valley Institute of Technology)

EVIT adds to a student’s academic instruction with hands-on learning provided by experienced professionals. Students can earn elective credit in more than 40 occupation-specific programs. EVIT programs are tuition-free to EDUPRIZE High School students. EHS students would provide their own transportation to their respective EVIT campus in the mornings. A vehicle from EHS will transport your student to EHS for their afternoon core classes. Please see your counselor for additional information and registration steps.

Post-High School Planning

College and other post-secondary institutions have entrance requirements that vary from high school requirements, to those that are extremely selective. The following information may be helpful to you as you plan your high school courses. Post High School planning is most effective when student, family, counselor, and school staff work together.

In general, admissions are based on a student's preparation, and the following factors are those most commonly considered:

1. Grade Point Average
2. High school courses completed
3. College Acceptance Test scores
4. Extracurricular and community activities including evidence of leadership

Students should select courses that reflect their interests, talents and goals. Taking academic courses without being able to learn the material adequately and maintain a strong GPA is usually counter-productive. Moreover, many colleges are looking for students with a background in arts, extracurricular activities and community services as well as academics.

Students are encouraged to meet with their counselor to obtain specific information to help with their planning.

International Baccalaureate Diploma Programme

The International Baccalaureate (IB) is a college preparatory program with a comprehensive and rigorous liberal arts curriculum, leading to examinations in the junior and senior years. The program is designed for motivated students who work well in a structured academic setting.

Strengths of the IB Program

Focuses on preparing students for success in college

Increases college acceptance opportunities

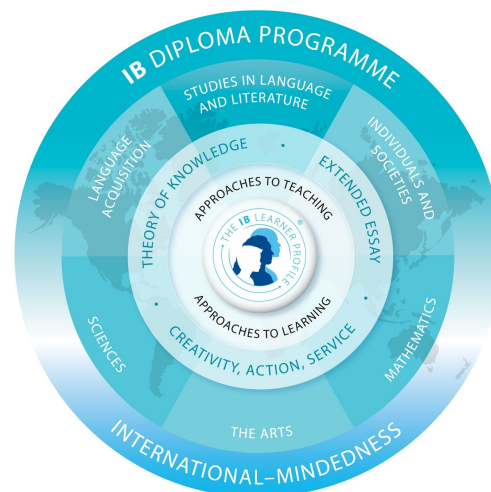

Prepares for competence in all major academic areas

Results in opportunities for advanced standing or course credit at the college level

Promotes learning beyond current honors offerings

Promotes international understanding through a shared academic experience

Promotes holistic learning through interdisciplinary connections and CAS requirements

Primary Language: English

ELA (7th Grade)

Grade Level - 7th	Full Year	
-------------------	-----------	--

7th Grade ELA is an accelerated language arts program with an emphasis on enrichment experiences, including project based literature studies, composition, grammar, research and reading. Emphasis will be placed on writing in this class, students will learn narrative, informative, research and argumentative writing techniques. The course will be taught by utilizing teaching practices such as group discussions, PowerPoint presentations and student-facilitated groups and activities.

ELA (8th Grade)

Grade Level - 8th	Full Year	
-------------------	-----------	--

Through a broad spectrum of literary and informational genres, the ELA Grade 8 thematic units explore the trials and tensions, great and small, of the human experience; these units range from a focus on suspense to focus on war literature. Students will read and analyze poetry, speeches, short stories, essays, and novels. Major Works studied include *Lord of the Flies*, *The Adventures of Tom Sawyer*, *A Diary of Anne Frank the Play*, and *The Red Badge of Courage*. Students practice writing for various purposes, producing persuasive, narrative, and explanatory text. The aim is for students to be able to write a 5-paragraph essay, complete with the incorporation of textual evidence and proper grammar, to prepare them for more in-depth research writing in high school. Students also practice various forms of discussion from debate to socratic seminar.

Honors Option

Through a broad spectrum of literary and informational genres, the Honors ELA Grade 8 Thematic Units explore the trials and tensions, great and small, of the human experience; these units range from a focus on suspense to focus on war literature. Students will read and analyze poetry, speeches, short stories, essays, and novels. Major Works studied include *Lord of the Flies*, *The Adventures of Tom Sawyer*, *The Boy in the Striped Pajamas*, and *The Red Badge of Courage*, *Hound of the Baskervilles*, *Little Women*, *A Narrative of the Life of Frederick Douglass*, and *the Diary of Anne Frank the Play*. Students practice writing for various purposes, producing persuasive, narrative, and explanatory text. The aim is for students to be able to write a 5-paragraph essay, complete with the incorporation of textual evidence and proper grammar, to prepare them for more in-depth research writing in high school. Students also practice various forms of discussion from debate to socratic seminar. Honors English 8 students are expected to read several of works independently and be prepared for discussions on those works. The expectation is also that their writing will include more depth and breadth. Vocabulary study is also more extensive.

English 9

Grade Level - 9th	Full Year	1 Credit
-------------------	-----------	----------

English 9 focuses primarily on introducing students to “classic literature.” Students are taught to read and analyze texts that shaped controversial viewpoints in society over the last few decades. Major works include *To Kill a Mockingbird, 1984, Angela's Ashes, and Romeo and Juliet*. Analysis is conducted through Socratic Seminars, Formal Debates, This or That Debates, Reflection Writing, and Essays. Students practice various forms of writing from persuasive essays to narrative stories. In addition, our major focus is practicing using MLA Format and learning to obtain research from reliable sources. Overall, students are taught to connect classic literature to present day events, as well as experiences.

The expectation of students entering ELA 9 is that they know the general rules of grammar, are capable of producing a basic 5-paragraph essay complete with textual evidence, and that they have a basic understanding of MLA Format.

Honors English 9

Honors English 9 focuses primarily on introducing students to “classic literature.” Students are taught to read and analyze texts that shaped controversial viewpoints in society over the last few decades. Major works include *To Kill a Mockingbird, The Jungle, 1984, Of Mice and Men, I Know Why the Caged Bird Sings, Angela's Ashes, and Romeo and Juliet*. Analysis is conducted through Socratic Seminars, Formal Debates, This or That Debates, Reflection Writing, and Essays. Students practice various forms of writing from persuasive essays to narrative stories. In addition, our major focus is practicing using MLA Format and learning to obtain research from reliable sources. Overall, students are taught to connect classic literature to present day events, as well as experiences.

The expectation of students entering Honors ELA 9 is that they know the general rules of grammar, are able to generate synonyms & antonyms for vocabulary terms, are capable of producing a basic 5-paragraph essay complete with textual evidence, and that they have a basic understanding of MLA format.

English 10

Grade Level - 10th	Full Year	1 Credit
--------------------	-----------	----------

English 10 primarily focuses on presenting students with the challenging dilemmas we face in the twenty-first century including technical difficulties, and whether or not we control our destiny. Major works that will be covered include: *Macbeth, Animal Farm, Frankenstein, and The Book Thief*. Students will enhance their vocabulary, grammar, writing, and reading skills through novel studies (one per Quarter), short story studies via our Curriculum Study Sync, grammar units, and vocabulary units. This course is designed to be student-centric, which means students will be enhancing their speaking and listening skills through a combination of activities designed to promote critical thinking, social consciousness, and deductive/inductive reasoning.

Analysis is conducted via in-class discussions and debates, and essays. Students practice various forms of writing from persuasive essays to narrative stories, emulating the rhetorical

and literary devices used by the authors studied. The expectation of students completing English 10 is that they will leave this class knowing the rules of grammar, will be adept at writing a basic five-paragraph essay complete with textual evidence, and that they will be familiar with MLA format.

Honors English 10

Honors ELA 10th graders will experience a more intellectually challenging environment than the on-level 10th grade course due to the following differences: students will be required to not only know the definitions of vocabulary terms, but also their synonyms and antonyms; students will cover two full-length novels per Quarter, versus just the one; students will be required to hold more Socratic Seminars than the on-level course; and students will be required to incorporate more textual evidence in their essays.

English 11

Grade Level - 11th	Full Year	1 Credit
--------------------	-----------	----------

English 11 focuses primarily on a study of American Literature from the Colonial Period to the present, with an introduction to British Literature during the 4th quarter. Students read and analyze seminal U.S. documents, poetry, and fiction from the standpoint of the effectiveness of the rhetoric and literary devices used. Major works include *The Crucible*, *The Great Gatsby*, *The Adventures of Huckleberry Finn* and *Midsummer's Night Dream*. Analysis is conducted via in-class discussions, debates, and essays. Students practice various forms of writing from persuasive essays to narrative stories, emulating the rhetorical and literary devices used by the authors studied. The expectation of students entering English 11 is that they know the rules of grammar, are adept at writing a basic 5-paragraph essay complete with textual evidence, and that they are familiar with MLA format.

English 11 IB Language and Literature/Dual Enrollment

Grade Level - 11th	Full Year	1 Credit
--------------------	-----------	----------

English 11 IB/Dual Enrollment meets both the criteria required for Parts 1 and 2 of IB Language A: Language & Literature and English 101 through Rio Salado College. Semester 1 of this course focuses on the way cultural context affects language while Semester 2 focuses on the use of language in mass communication. Major works include *The Fountainhead*, *The Great Gatsby*, *Hiroshima*, *Walden*, *First Men in the Moon*, *Fahrenheit 451*, and *The Adventures of Huckleberry Finn*. In addition to the major works studied, students will analyze short nonfiction pieces from various fields. Students will participate in in-depth discussions, write rhetorical analyses, and present oral interpretations of texts. Students are encouraged to delve deeply into and beyond the texts they read both orally and in writing. The expectation of students entering IB English 11 is that they are adept at incorporating the correct conventions of the English language and relevant textual evidence in their writing. Students should also be familiar with MLA format.

English 12

Grade Level - 12th	Full Year	1 Credit
--------------------	-----------	----------

English 12 Units take students through classic texts of British Literature, spanning from the Anglo-Saxon Period to the Modern Age. Paired with the British classics are canonical pieces of American Literature. These pairings demonstrate the influence of British literary movements, writing styles, and philosophical ideas on American authors and will help students make connections between British and American literature, history, and culture. Major works include *Beowulf*, *Hamlet*, and *Persepolis*. Analysis is conducted via in-class discussions, debates, and essays. Students practice various forms of writing from persuasive essays to narrative stories, emulating the rhetorical and literary devices used by the authors studied. The expectation of students entering English 12 is that they know the rules of grammar, are adept at writing a basic 5-paragraph essay complete with textual evidence, and that they are familiar with MLA format. Students will strengthen research and writing skills to prepare for career and college expectations.

English 12 IB Language and Literature/Dual Enrollment

Grade Level - 12th	Full Year	1 Credit
--------------------	-----------	----------

IB English 12 is the third and fourth of four parts in the two-year IB Language A: Language and Literature Program. For Parts 3 and 4, the course is focused on the study of literary analysis and also the ability of students to present their ideas effectively. Students may also opt to take this course as dual enrollment via Rio Salado College.

A key aim is the development of critical literacy. Students will be introduced to the critical study and interpretation of written and spoken texts from a wide range of literary genres. The formal analysis of literary texts is supplemented by awareness that meaning is not fixed but can change in respect to contexts of production and consumption. Students will also gain a greater understanding of mechanics of literature, exploring various literary devices such as imagery, irony, and narrative voice in preparation for IB written exams.

Second Language Acquisition

Spanish 1

Grade Level - 8th - 12th	Full Year	1 Credit
--------------------------	-----------	----------

Students are introduced to speaking, listening, writing and reading Spanish. Students will be able to communicate with basic conversational skills and learn about cultures that are relevant to the Spanish language. Eighth graders interested in enrolling in a foreign language course should be honors students and have strong teacher recommendations. Honors eighth graders who successfully complete the Spanish 1 will receive high school language credit. In order to progress to the next level students must successfully complete the course with a grade of a C or higher.

Spanish 2

Grade Level - 9th - 12th	Full Year	1 Credit
--------------------------	-----------	----------

This course is offered to students who have successfully completed Spanish 1. Students will learn a variety of verb tenses, learn increased thematic vocabulary, and augment their communicative skills: reading, writing, listening and speaking in Spanish. In order to progress to the next level of the language, students must earn a final grade of a B or higher or receive a strong teacher recommendation. Students transferring to EDUPRIZE from other schools are required to take a pre-diagnostic test regardless of transfer grade before entering in Level 2 of any language.

Spanish 3

Grade Level - 9th - 12th	Full Year	1 Credit
--------------------------	-----------	----------

This course is offered to students who have successfully completed Spanish 2. Instruction will be mostly delivered Spanish. Students will learn more advanced communication skills. Students will be expected to express themselves in Spanish the majority of the time. They will be exposed to different genres of literature, film and more interactive activities.

IB Spanish

Grade Level - 11th - 12th	Full Year	1 Credit
---------------------------	-----------	----------

Students must be proficient in their speaking, reading, writing, and listening skills in Spanish. Students must exhibit the IB Learner's Profile. This course is rigorous and fast paced, and students are expected to perform at an advanced level. As students progress through this

course, they will master the language skills and intercultural understanding, which will enable them to be prepared for the IB expectations.

German 1

Grade Level - 8th - 12th	Full Year	1 Credit
--------------------------	-----------	----------

Students are introduced to speaking, listening, writing and reading German. Students will be able to communicate with basic conversational skills and learn about cultures that are relevant to the German language. Eighth graders interested in enrolling in a foreign language course should be honors students and have strong teacher recommendations. Honors eighth graders who successfully complete German 1 will receive high school language credit. In order to progress to the next level students must successfully complete the course with a grade of a C or higher.

German 2

Grade Level - 9th - 12th	Full Year	1 Credit
--------------------------	-----------	----------

This course is offered to students who have successfully completed German 1. Students will learn a variety of verb tenses, learn increased thematic vocabulary, and augment their communicative skills: reading, writing, listening and speaking in German. In order to progress to the next level of the language, students must earn a final grade of a B or higher or receive a strong teacher recommendation. Students transferring to EDUPRIZE from other schools are required to take a pre-diagnostic test regardless of transfer grade before entering in Level 2 of any language.

German 3

Grade Level - 9th - 12th	Full Year	1 Credit
--------------------------	-----------	----------

This course is offered to students who have successfully completed German 2. Instruction will be mostly delivered Spanish. Students will learn more advanced communication skills. Students will be expected to express themselves in Spanish the majority of the time. They will be exposed to different genres of literature, film and more interactive activities.

IB German

Grade Level - 11th - 12th	Full Year	1 Credit
---------------------------	-----------	----------

Students must be proficient in their speaking, reading, writing, and listening skills in German. Students must exhibit the IB Learner's Profile. This course is rigorous and fast paced, and

students are expected to perform at an advanced level. As students progress through this course, they will master the language skills and intercultural understanding, which will enable them to be prepared for the IB expectations.

Social Sciences

Social Studies (7th Grade)

Grade Level - 7th	Full Year	
-------------------	-----------	--

This course follows the AZ State standards. Some of our areas of study will include the American Civil War, Reconstruction, the Industrial Revolution, Immigration, and WWI. This course includes projects as well as written components that connect with our 7th grade ELA standards. The course will include a variety of instructional practices such as, group discussions, PowerPoint presentations, and student-facilitated groups and activities.

History (8th Grade)

Grade Level - 8th	Full Year	
-------------------	-----------	--

This 8th grade social studies class centers on the history of our nation from the French and Indian War to the end of World War II. The course focuses on the American Revolution, the formation of the U.S. Constitution, and function of the federal government. It links with other 8th grade disciplines to create project based approaches that student inquiry that drives the learning process. Students will examine political, economic, technological and social developments of the United States; this includes the influence of diverse groups on cultural developments that helped shape American history. The course is based on the Arizona State Standards for American History, Civics and government.

World History and Geography

Grade Level - 9th	Full Year	1 Credit
-------------------	-----------	----------

World History and Geography is the first course in the High School Social Studies Program. This course is designed to provide students with the skills and knowledge to understand the major concepts, characteristics, events and people of ancient history through WWI. The course will include an overview of Ancient and Western Civilizations. Economic and political developments, geographic concepts, belief systems and cultural contributions are integrated into the curriculum. The course is based on the Arizona State Social Studies Standards for World History.

US Government Comprehensive

Grade Level - 10th	One Semester	1/2 Credit
--------------------	--------------	------------

U.S. Government is a semester long course offered to high school sophomores at Eduprize High School. The course is designed to give students an insight into the U.S. political system at the local, state, and national levels. Students will investigate the foundations, principles, and practices of the United States government as a constitutional republic and representative democracy. Students may take this course at the honors level with recommendation from previous social science teacher.

Economics

Grade Level - 10th	One Semester	1/2 Credit
--------------------	--------------	------------

The Economics course provides students with the knowledge and decision-making tools necessary for understanding how society organizes its limited resources to satisfy its unlimited wants. Students who are enrolled in the economics course will deepen their knowledge of choices they must make as producers and consumers. Students will learn economic reasoning, principles of decision-making in the marketplace, productive resources, scarcity and choices, opportunity costs and trade-offs, economic incentive, interdependence, contemporary and historical economic issues, personal economic skills, role of money, government and financial institutions and labor. Students may take this course at the honors level with recommendation from previous social science teacher.

IB American History

IB History (World Topics)

Grade Level - 11th - 12th	Full Year	1 Credit
---------------------------	-----------	----------

Over the course of the two years, students will engage in a systematic study of the History of the Americas. As part of their course of study, students will examine the political and diplomatic, intellectual and cultural, and social and economic history of the Americas. An international aspect will be incorporated into the course in two ways. Students will examine the interaction between American nations throughout the time period of the course. Comparisons and connections will be made between events in the Americas and events in other regions of the world on an ongoing basis throughout the two years.

Civics/Resource American History

Grade Level - 9th -10th	Full Year	1 Credit
-------------------------	-----------	----------

In this course, students will study the foundation of American democracy and analyze the origins and formation of the government within the United States. Emphasis is placed on the US Constitution, rights and responsibilities of citizens within a society. Students will analyze each branch of government, examine the historical formations and platforms of different political parties, and analyze decisions that have had a lasting effect on the United States.

Natural Science & Technology

Science (7th Grade)

Grade Level - 7th	Full Year	
-------------------	-----------	--

The underlying principles that will direct the entire course will be the scientific method wherein it will be continually emphasized that in science we never prove anything, but continually look to expand our understanding of the physical world by creating hypotheses and looking at those who have come before us, and finding evidence—through experimentation, observation, logical reasoning—to support, or reject those theories. We shall explore the leading theories about how the world works above and below its surface, the biology found upon its surface, and the wonders in the sky above its surface. Many discoveries remain to be made and great progress is expected in the 21st century. Through studying a science subject students should become aware of how scientists work and communicate with each other. While the scientific method may take on a wide variety of forms, the emphasis on a practical approach. In addition, through the overarching theme of the “Nature of Science” this knowledge and skills will be put into the context of way science and scientists work in the 21st Century and the ethical debates and limitations of creative scientific endeavor. The sciences are taught practically. Students have opportunities to design investigations, collect data, develop manipulative skills, analyze results, collaborate with peers and evaluate and communicate their findings. The investigations may be laboratory based or they may make use of simulations and data bases.

Honors Option

Honors courses in our science department offer a more rigorous curriculum and accelerated pace from our general courses. The homework for these courses can often be more intense although not necessarily more frequent. The teachers of our honors courses strive to engage students in the application of concepts learned in class in addition to higher level thinking exercises and activities. All students are welcome to take honors science courses but a grade of C or better must be maintained in order to continue enrollment in the course.

Science (8th Grade)

Grade Level - 8th	Full Year	
-------------------	-----------	--

Students will solidify their scientific knowledge with a curriculum that overviews many different science disciplines. They will enjoy learning Chemistry, Physics, Biology, and Environmental Science through fun labs and investigative projects.

Honors Option

Honors courses in our science department offer a more rigorous curriculum and accelerated pace from our general courses. The homework for these courses can often be more intense although not necessarily more frequent. The teachers of our honors courses strive to engage students in the application of concepts learned in class in addition to higher level thinking exercises and activities. All students are welcome to take honors science courses but a grade of C or better must be maintained in order to continue enrollment in the course.

Prerequisites: Completion of 7th Grade Science

Physics - Conceptual

Grade Level - 9th	Full Year	1 Credit
-------------------	-----------	----------

The course covers the basic principles of physical science to provide significant breadth and depth to how the world works. Topics include mechanics (laws of motion, momentum, energy, simple machines), electricity, sound, and light. The course is taught from a conceptual level, requiring basic algebra to understand principles and to solve problems. It is a lab course, using the inquiry approach to ensure understanding by discerning patterns by observation of data.

Honors Option

Honors courses in our science department offer a more rigorous curriculum and accelerated pace from our general courses. The homework for these courses can often be more intense although not necessarily more frequent. The teachers of our honors courses strive to engage students in the application of concepts learned in class in addition to higher level thinking exercises and activities. All students are welcome to take honors science courses but a grade of C or better must be maintained in order to continue enrollment in the course.

Chemistry

Grade Level - 10th	Full Year	1 Credit
--------------------	-----------	----------

Students explore the fundamental principles of chemistry which characterize the properties of matter and how it reacts. Chemistry also deals with the study of the changes of matter and the mechanisms by which changes occur. The class will be taught using the “modeling” pedagogy; a teaching technique focusing on inquiry, pictorial and graphical representations of chemical processes, Socratic questioning, and student-led discussions.

Honors Option

Honors courses in our science department offer a more rigorous curriculum and accelerated pace from our general courses. The homework for these courses can often be more intense although not necessarily more frequent. The teachers of our honors courses strive to engage students in the application of concepts learned in class in addition to higher level thinking exercises and activities. All students are welcome to take honors science courses but a grade of C or better must be maintained in order to continue enrollment in the course.

Biology

Grade Level - 11th	Full Year	1 Credit
--------------------	-----------	----------

The major purpose of this course is to understand the underlying principles of the biological sciences. Students will investigate how all living organisms interact with each other and their environment. Students will learn how scientists use the scientific method, to examine the natural world, and make intelligent objective decisions using data. This course is a prerequisite to college level biology courses and introduces major topics within the biological sciences such as: cellular biology, genetics, evolution and ecology. Students will experience a range of modalities to help them comprehend and apply their knowledge to higher level biological concepts.

Honors Option

Honors courses in our science department offer a more rigorous curriculum and accelerated pace from our general courses. The homework for these courses can often be more intense although not necessarily more frequent. The teachers of our honors courses strive to engage students in the application of concepts learned in class in addition to higher level thinking exercises and activities. All students are welcome to take honors science courses but a grade of C or better must be maintained in order to continue enrollment in the course.

Bioscience Technologies

Grade Level - 9th - 12th	Full Year	1 Credit
--------------------------	-----------	----------

Biotechnology is designed to provide students the opportunity to experience the innovative science of biotechnology. This course is an introduction to biotechnology and its global impact on society. It covers applications of biotechnology, laboratory techniques, limitations and the international economic benefits, risks, and legal and ethical issues associated with biotechnology.

Prerequisites: Successful completion of one or all of the following, high school integrated/physical science, biology, chemistry.

Environmental Science

Grade Level - 12th	Full Year	1 Credit
--------------------	-----------	----------

The goal of this interdisciplinary course is to provide students with the scientific principles, concepts, and methodologies required to understand the interrelationships of the natural world, to identify and analyze environmental problems both natural and human-made, to evaluate the relative risks associated with these problems, and to examine alternative solutions for resolving or preventing them. This course will use lectures, class discussions, audio-visual materials, labs, writing reading debate and guest speakers to present: 1) problems associated with the use/misuse of our global natural resources and 2) current management practices associated with the conservation of natural resources. The course will focus on environmental management and conservation issues facing Arizona and our global society. Students will be engaging in their own individual research projects designed to examine these issues in a scientifically valid way.

IB Biology (11th Grade)

IB Biology (12th Grade)

Grade Level 11th - 12th	Full Year	1 Credit
-------------------------	-----------	----------

Biologists investigate the living world at all levels using many different approaches and techniques. At one end of the scale is the cell, its molecular construction and complex metabolic reactions. At the other end of the scale biologists investigate the interactions that make whole ecosystems function. Many discoveries remain to be made and great progress is expected in the 21st century. Through studying a science subject students should become aware of how scientists work and communicate with each other. While the scientific method may take on a wide variety of forms, the emphasis on a practical approach. In addition, through the overarching theme of the "Nature of Science" this knowledge and skills will be put into the context of way science and scientists work in the 21st Century and the ethical debates and limitations of creative scientific endeavor. The sciences are taught practically. Students have opportunities to design investigations, collect data, develop manipulative skills, analyze results, collaborate with peers and evaluate and communicate their findings. The investigations may be laboratory based or they may make use of simulations and data bases. Students develop the skills to work independently on their own design, but also collegiately, including collaboration with schools in different regions, to mirror the way in which scientific research is conducted in the wider community.

Introduction to Engineering Design

Grade Level 9th - 12th	Full Year	1 Credit
------------------------	-----------	----------

Students are introduced to the engineering profession and a common approach to the solution of engineering problems, an engineering design process. Utilizing the activity-project-problem-based (APB) teaching and learning pedagogy, students will progress

from completing structured activities to solving open-ended projects and problems that require them to develop planning, documentation, communication, and other professional skills.

Principles of Engineering

Grade Level 9th - 12th	Full Year	1 Credit
------------------------	-----------	----------

This course exposes students to some of the major concepts that they will encounter in a postsecondary engineering course of study. Through problems that engage and challenge, students explore a broad range of engineering topics, including mechanisms, the strength of materials and structures, automation, and kinematics. The course applies and concurrently develops secondary level knowledge and skills in mathematics, science, and technology.

Digital Electronics

Grade Level 10th - 11th	Full Year	1 Credit
-------------------------	-----------	----------

Digital Electronics (DE) is a high school level course that is appropriate for students interested in exploring electronics. Digital electronics is the study of electronic circuits that are used to process and control digital signals. The major focus of the DE course is to expose students to the design process of combinational and sequential logic design, teamwork, communication methods, engineering standards, and technical documentation. Utilizing the activity-project-problem-based (APB) teaching and learning pedagogy, students will analyze, design, and build digital electronic circuits. While implementing these designs, students will continually hone their professional skills, creative abilities, and understanding of the circuit design process. Other than their concurrent enrollment in college preparatory mathematics and science courses, this course assumes no previous knowledge.

Gateway to Engineering

Grade Level - 7th - 8th	Full Year	
-------------------------	-----------	--

This course includes two units: Magic of Electrons and Science of Technology. Through hands-on projects, students explore electricity, the behavior and parts of atoms, and sensing devices in the Magic of Electrons (ME) unit. They learn knowledge and skills in basic circuitry design and examine the impact of electricity on the world around them. In the Science of Technology (ST) unit, students explore how science impacts the technology of yesterday, today, and the future. Students apply the concepts of physics, chemistry, and nanotechnology to STEM activities and projects, including making ice cream, cleaning up an oil spill, and discovering the properties of nanomaterials.

Geographic Information Systems

Grade Level - 10th	One Semester	1/2 Credit
--------------------	--------------	------------

Students will identify and appreciate the diversity of information representable in a map. They will use mapping software (ArcMap), arcgis online and other free programs to manipulate and display information on a map. Students will explore the use of maps in other content areas (History, Science, Math and Language).

Mathematics

Math (7th Grade)

Grade Level - 7th	Full Year	
-------------------	-----------	--

In 7th grade, both honors and standard level, students will be learning Pre-Algebra; in honors, the same concepts will be taught, but at a much deeper level of understanding. The course will begin with a review of variables, expressions, and integers that should have been taught in 6th grade; all properties related to solving equations will also be reviewed along with how to determine factors and multiples, converting between fractions, decimals, and percents, along with working with all types of rational numbers. Students will learn to solve both single-step and multi-step equations, and explore scientific notation. Ratios, proportions, and probabilities will be used to determine unknown variables particularly with scale models. All aspects of graphing functions on coordinate planes, and inequalities will be covered, with finding area and volume of polygons and three-dimensional shapes.

Additionally, students will master the skill of taking interactive Cornell notes that will prepare them for higher educational pursuits; these notes will be formatted in a way that will allow students to study from them easily, as well as find lessons from the past to help with future success. The art of retention will be enhanced through utilizing depth and complexity icons to make abstract connections.

Math (8th Grade)

Grade Level - 8th	Full Year	
-------------------	-----------	--

Math competency and development of deductive and critical thinking are essential to success in today's world. This course is designed to provide an in depth understanding of the fundamentals of Algebra found within the Core Curriculum Content Standards. The course connects arithmetic and concepts of elementary mathematics and enable a student to make a successful transition to algebra and geometry. Throughout the course, students explore the language of algebra, geometry, and other areas of mathematics in verbal, tabular, graphical, and symbolic form. The change to algebra is done by examining the use of variables in pattern

generalizations, abbreviations in formulas, and unknowns in sentences to be solved. The course balances modeling activities by providing students with the opportunity to develop critical paper-and-pencil skills such as computation involving integers and rational numbers and solving equations.

Algebra

Grade Level 8th - 9th	Full Year	1 Credit
-----------------------	-----------	----------

Algebra 1 is a one-year course that builds on arithmetic skills and algebraic concepts taught in the earlier grades. The course is designed to provide a solid foundation of algebra following the Common Core State Standards for the college-bound student. The curriculum largely parallels that of Algebra 1 Honors, but includes a more rigorous review at the start of the year and a somewhat less rigorous level of in-depth study in some areas.

Honors Option

The Algebra I Honors course is designed to provide students with an in-depth level of instruction, an accelerated pace and a cooperative learning environment. The course will provide a rigorous study of traditional algebra topics from the Common Core State Standards. The course guides students in the development of critical thinking skills and algebraic problem solving skills which provide the foundation for real world problem-solving. It is targeted to highly motivated students who have previously had some algebra. Modeling and problem solving are at the heart of the curriculum. Mathematical modeling consists of recognizing and clarifying mathematical structures that are embedded in other contexts, formulating a problem in mathematical terms, using mathematical strategies to reach a solution and interpreting the solution in the context of the original problem. Students must be able to solve practical problems, representing and analyzing the situation using symbols, graphs, tables or diagrams.

Geometry

Grade Level 9th - 10th	Full Year	1 Credit
------------------------	-----------	----------

This Geometry class covers the basic concepts of plane, solid, coordinate, and some analytic geometry stressing deductive proof and reasoning. Throughout the year, the properties learned in algebra are reintroduced into this course. Moving towards formal mathematical arguments, the standards presented in this high school geometry course are meant to formalize and extend middle grades geometric experiences. The aims and objectives of the course are to develop and show the value of the logic of deductive reasoning and to improve and increase the understanding and application of the terminology, the symbolism, and the structure of mathematics. Students will be shown how the analysis of data collected through the observation and measurement of geometric figures can lead to a formal statement of a geometric relationship. The course meet the Common Core Math Standards of High School Geometry.

Honors Option

The purpose of Honors Geometry is to develop the student's abilities to formulate logical patterns of mathematical thought. The course meets the Common Core Math Standards of

High School Geometry. The students will learn how to read mathematics, how to describe mathematical ideas in rigorous language and how to use their creativity in the solutions of challenging problems. The aims and objectives of the course are to develop and show the value of the logic of deductive reasoning and to improve and increase the understanding and application of the terminology, the symbolism, and the structure of mathematics. The problems explored involve intense analytical thought and require strong algebraic skills. Non-Euclidean geometries such as fractal geometry and the Lenart sphere are investigated. Through the use of their algebraic skills and the knowledge developed relating to plane, solid, and analytic geometric concepts, the students will extend their foundation of mathematics for further mathematics courses and the sciences. As an honors course the students will also be expected to spend additional time beyond that normally expected in a mathematics course.

Algebra 2

Grade Level 10th - 12th	Full Year	1 Credit
-------------------------	-----------	----------

Algebra 2 complements and expands the mathematical content and concepts of Algebra I and Geometry. Students will build on their work with linear, quadratic, and exponential functions as well as expand into further functions such as logarithmic, polynomial, rational, and radical functions. Through means of small group work, individual assignments, class activities, lecture, and class discussions, the many facets of algebraic applications will be explored. Students will develop learning strategies, critical thinking skills, and problem solving techniques to prepare for future mathematics courses. Further, students will use current technology, such as the graphing calculator, as well as other available computer software, such as Desmos, to display and represent various concepts. The course is designed to provide a solid foundation of Algebra 2 following the Common Core State Standards for the college-bound student.

Honors Option

Honors Algebra 2 is a rigorous, accelerated course that provides students with advanced algebraic concepts and technological skills that will support future work in advanced mathematics. Through means of small group work, individual assignments, class activities and class discussions, the many facets of advanced algebraic applications will be explored. The students will develop a logical and analytical approach to accurate problem solving. As the students examine a variety of mathematical models, they will deepen their ability to read, communicate and work in mathematics and apply these concepts to future mathematics courses. This course is intended for students who have successfully completed Honors Geometry and have a desire to pursue advanced placement mathematics and/or a mathematics based profession. The course is designed to provide a solid foundation of algebra 2 following the Common Core State Standards for the college-bound student.

Consumer Math

Grade Level 12th	Full Year	1 Credit
------------------	-----------	----------

Financial literacy is essential in meeting the financial challenge of the 21st Century. The competencies, which form the basis for this course, enable students to recognize their rights and responsibilities in financial situations encountered later in life. The course presents

essential knowledge and skills to make informed decisions about real world financial issues. Students will learn how choices influence occupational options and future earning potential. Students will also learn to apply decision-making skills to evaluate career choices and set personal goals. The course content is designed to help the learner make wise spending, saving, and credit decisions and to make effective use of income to achieve personal financial success.

Financial Algebra

Grade Level 12th	Full Year	1 Credit
------------------	-----------	----------

In this class, students will practice algebra and geometric mathematics using financial business applications. Specific areas that will be covered include the decision making process, financial aspects of career planning, financial management, income analysis, budgeting techniques, savings and investment strategies in order to meet short and long term goals, evaluation of services offered by financial institutions, managing credit cards and debt, risk analysis, fraud and financial loss. Students will learn work readiness skills to prepare them for career and college. This class meets the fourth year math requirement for students.

IB Math

Grade Level 11th - 12th	Full Year	1 Credit
-------------------------	-----------	----------

IB Math - SL

The IB DP mathematics standard level (SL) course focuses on introducing important mathematical concepts through the development of mathematical techniques. The intention is to introduce students to these concepts in a comprehensible and coherent way, rather than insisting on the mathematical rigor required for mathematics HL. Students should, wherever possible, apply the mathematical knowledge they have acquired to solve realistic problems set in an appropriate context. The internally assessed exploration offers students the opportunity for developing independence in their mathematical learning. Students are encouraged to take a considered approach to various mathematical activities and to explore different mathematical ideas. The exploration also allows students to work without the time constraints of a written examination and to develop the skills they need for communicating mathematical ideas.

IB Math Studies - SL

The IB DP mathematical studies standard level (SL) course focuses on important interconnected mathematical topics. The syllabus focuses on: placing more emphasis on student understanding of fundamental concepts than on symbolic manipulation and complex manipulative skills; giving greater emphasis to developing students' mathematical reasoning rather than performing routine operations; solving mathematical problems embedded in a wide range of contexts; using the calculator effectively. There is an emphasis on applications of mathematics and statistical techniques. It is designed to offer students with varied mathematical backgrounds and abilities the opportunity to learn important concepts and techniques and to gain an understanding of a wide variety of mathematical topics, preparing

them to solve problems in a variety of settings, develop more sophisticated mathematical reasoning and enhance their critical thinking.

Engineering Math

Grade Level 11th - 12th	Full Year	1 Credit
-------------------------	-----------	----------

Fine/Practical Arts

Choir (Jr High)

Grade Level - 7th - 8th	Full Year	
-------------------------	-----------	--

The prerequisite for Concert Choir, this is an ensemble based class, where students will learn: the basics of music theory & history, how to practice, how to find their voice, and how to sing as a member of a group both accompanied and unaccompanied. Different from elementary choir, this course will be a student's first real ensemble setting where students will read music and sing in 2 to 3 parts. At the end of the year students will be well on their way to being a successful musician. This ensemble has 2 concerts a year.

Theater (Jr High)

Grade Level - 7th - 8th	Full Year	
-------------------------	-----------	--

The Junior High Theater Course focuses on improving self esteem, collaboration, and public speaking through the development of drama skills. Students will learn about the history of theater and create short plays that focus on the different techniques used during that specific time period. The course introduces the following skills: script writing, improvisation, blocking scripts, script analysis, set design and set building, stage makeup, costume design, character development, stage lighting, and sound effects. The class will produce a play that is performed for the public.

Guitar (Jr High)

Grade Level - 7th - 8th	Full Year	
-------------------------	-----------	--

An introductory course into the basic of guitar. Students will learn how to read music notation and be introduced to the basic of music theory. Students will work in small groups and as a whole to play individual notes and chords. Students are expected to treat materials such as guitars and music with respect and work well with other students.

Band (Jr High)

Grade Level - 7th - 8th	Full Year	
-------------------------	-----------	--

Band is a class intended for students with an interest in learning and expounding upon musical skills. Students will work as an ensemble and as an individual to learn and improve as a musician. This class is meant for students with at least 2 year of previous band experience or approval from instructor. Students will be required to provide their own instruments. For percussion and large low brass talk to instructor.

Strings (Jr High)

Grade Level 7th - 8th	Full Year	
-----------------------	-----------	--

This class is for students who have taken at least one year of previous orchestra experience and can play in the key of D, G, A and C. Students will further their skills in and mastery of musicianship fundamentals such as posture/positioning, notation reading, rhythm, bowing techniques and intonation, and vibrato. The keys of F, B flat, and E flat will also be introduced. Students will be introduced to a variety of genres of music such as Classical, Pop, Folk, Broadway, Rock, etc. Baroque, Renaissance, Classical, Romantic and Modern Musical History periods will be surveyed. This is a performance based class and we will be participating in local festivals and competitions. Participation in all performances is a required expectation of this course.

Art (Jr High)

Grade Level 7th	Full Year	
-----------------	-----------	--

An introductory art course for students in 7th grade. Students study the foundations of art and create a studio project based on each art element. The focus of this course is mainly on two-dimensional artwork. Students maintain a visual journal, write reflections upon completion of each studio project, and also participate in other reading and writing assignments related to visual art.

Art (Jr High)

Grade Level 8th	Full Year	
-----------------	-----------	--

A foundational art course for students in 8th grade. Students explore the elements of art in more detail and create studio projects that encompass both two-dimensional and three-dimensional media and design. Students maintain a visual journal, write reflections upon completion of each studio project, and also participate in other reading and writing

assignments related to visual art. Students also begin the process of analyzing art using structured methods.

Concert Choir

Grade Level - 9th - 12th	Full Year	1 Credit
--------------------------	-----------	----------

The prerequisite for A Cappella Choir, this class advances students into the next level of musicianship. Starting the year with 3-part harmony and advancing to 4-part. This class will go further into: music theory & history, practice skills, and overall musicianship. This course will begin to unfold the subtle nuances of music to hone and define musical expression. This ensemble has 2 - 3 concerts a year.

A Cappella Choir

Grade Level - 9th - 12th	Full Year	1 Credit
--------------------------	-----------	----------

Audition Based This class is a culminating experience of your time in choir. Students sing freely of accompaniment and master the art of musical expression. Students become fluent in music theory & history and sing frequently in 8-part harmony. This is the premier ensemble for the school, and performs at all school functions. This ensemble also participates in choir competitions, and some travel can be expected.

Theater

Grade Level - 9th - 12th	Full Year	1 Credit
--------------------------	-----------	----------

The High School Drama Course focuses on the development of leadership skills, collaboration skills, and communication skills. Students will have the opportunity to direct short plays and also be stage managers. They will be introduced to the history of film and continue to learn about the history of theater. The class will produce an original silent film. They will continue to develop the following skills: script writing, improvisation, blocking scripts, script analysis, set design and set building, stage makeup, costume design, character development, stage lighting, and sound effects. The class will produce a play that is performed for the public.

Guitar

Grade Level - 9th - 12th	Full Year	1 Credit
--------------------------	-----------	----------

An introductory course into the basic of guitar. Students will learn how to read music notation and be introduced the basic of music theory. Students will work in small groups and as a whole to play individual notes and chords. Students are expected to treat materials such as guitars and music with respect and work well with other students.

Band

Grade Level - 9th - 12th	Full Year	1 Credit
--------------------------	-----------	----------

Band is a class intended for students with an interest in learning and expounding upon musical skills. Students will work as an ensemble and as an individual to learn and improve as a musician. This class is meant for those with 3 or more years of previous band experience or approval from instructor. Students will be required to provide their own instruments. For percussion and large low brass talk to instructor.

Strings Ensemble

Grade Level 9th - 12th	Full Year	1 Credit
------------------------	-----------	----------

This class is for students who have taken at least 2 years of previous orchestra experience, have mastered the first two books of Essential Elements of Strings, and/or who can demonstrate intermediate ability of expression and musicianship. Instructor approval required. We will be furthering musicianship fundamentals of posture/positioning, shifting into 3rd, 4th, and 5th positions, vibrato, bowing techniques and mastering music in a variety of genres, musical periods, key and time signatures. The keys of F, B flat, E flat and A flat will be introduced and the keys of D, G, A and C literature will also be performed. Musical Historical periods of Baroque, Renaissance, Classical, Romantic and Modern will be surveyed and explored. We will be participating in local music festivals and competitions. This is a performance based class and participation in all performances and tours is a required expectation of this course.

Art 1 2D

Grade Level 9th -10th	Full Year	1 Credit
-----------------------	-----------	----------

This is an entry level high school course where students review the elements of art and study the principles of design. Students create studio projects based on both the elements of art and principles of design using both two and three-dimensional media. Studio projects may vary from year to year, depending on the level of art experience of students. Students maintain a visual journal, write reflections upon completion of each studio project, analyze art using structured methods, and also participate in other reading and writing assignments related to visual art. Students write at least one art-related research paper each semester.

Art 2 3D

Grade Level 9th - 10th	Full Year	1 Credit
------------------------	-----------	----------

This is an intermediate level high school course where students review the elements of art and study the principles of design. Students create studio projects based on both the elements of art and principles of design using both two and three-dimensional media. Studio projects may vary from year to year, depending on the level of art experience of students. Students maintain

a visual journal, write reflections upon completion of each studio project, analyze art using structured methods, and also participate in other reading and writing assignments related to visual art. Students write at least one art-related research paper each semester.

IB Visual Art - Year 1

Grade Level 11th	Full Year	1 Credit
------------------	-----------	----------

During IB Art year 1 students are introduced to the three parts of the IB curriculum: visual journals, exhibition, and comparative study. Students complete studio projects based on given criteria in 2D, 3D and digital media. Students maintain visual journals, including process pages. Students write the 1st and 2nd draft of their comparative study.

IB Visual Art - Year 2

Grade Level 12th	Full Year	1 Credit
------------------	-----------	----------

Students in IB Art year 2 continue working on the three parts of the IB curriculum: visual journals, exhibition, and comparative study. Students select a concept and create a coherent body of studio work for exhibition in their preferred media (2D, 3D, or digital). Students study curatorial techniques and write a curatorial rationale and exhibition text for their final exhibition. They maintain visual journals and create a process portfolio in digital format. Students write the final draft of their comparative study. Students submit all required materials to IB by the required deadlines.

Photography

Grade Level 7th - 8th	Full Year	
-----------------------	-----------	--

This is an introductory photography class for students in 7th and 8th grade. This course will introduce the students to basic photography techniques, learning about both color and B&W digital photography and printing. This will include proper image exposure, basic composition, photo retouching and color balancing. Other topics will include: stop-action, selective coloring, close-up macro, painting with light, Polaroid emulsion transfers, star trails and HDR - High Dynamic Range photography.

Photography

Grade Level 9th - 12th	Full Year	1 Credit
------------------------	-----------	----------

This photography class is open to all students with all knowledge levels and experience. This course will introduce the students to basic photography techniques, learning about both color

and B&W digital photography and printing. This will include proper image exposure, basic composition, photo retouching and color balancing. Other topics will include: stop-action, selective coloring, close-up macro, painting with light, Polaroid emulsion transfers, star trails and HDR - High Dynamic Range photography.

Theory of Knowledge

Theory of Knowledge (11th Grade)

Grade Level - 11th	One Semester (spring)	1/2 Credit
--------------------	-----------------------	------------

Theory of Knowledge (12th Grade)

Grade Level - 12th	One Semester (fall)	1/2 Credit
--------------------	---------------------	------------

TOK is a course about critical thinking and inquiring into the process of knowing, rather than about learning a specific body of knowledge. It is a core element which all Diploma Programme students undertake, requiring at least 100 hours of class time. The TOK course examines how we know what we claim to know. It does this by encouraging students to analyse knowledge claims and explore knowledge questions. A knowledge claim is the assertion that “I/we know X” or “I/we know how to Y”, or a statement about knowledge; a knowledge question is an open question about knowledge. (TOK Course Guide 2014)

The TOK course runs concurrent to the rest of the IB curriculum as part of the second semester of the junior year, and first semester of the senior year. It is open to all EDUPRIZE students, and includes an essay (IB Prescribed title essay) and a presentation (can be in group) - both of which are submitted at the end of the second semester of the course (December).

Physical Education

Physical Education (7th Grade)

Grade Level - 7th	Full Year	
-------------------	-----------	--

Physical Education (8th Grade)

Grade Level - 8th	Full Year	
-------------------	-----------	--

Physical Education

Grade Level - 9th - 12th	Full Year	1 Credit
--------------------------	-----------	----------

The Physical Education curriculum provides students with opportunities to achieve and maintain a health-enhancing level of physical fitness and increase knowledge of fitness and health related concepts. Students will learn how to develop the skills and habits necessary for a lifetime of healthy living.

These courses include skill development and application of rules and strategies of varying difficulty in the following movement forms: health and skill related fitness activities, team sports, individual dual sports and recreation games. Ongoing assessment includes written and performance based skill evaluations.

Cross Training/Strength Conditioning

Grade Level - 9th - 12th	Full Year	1 Credit
--------------------------	-----------	----------

This course offers individualized weight training programs and aerobic conditioning, as well as curriculum related to strength, flexibility and lifetime well-being.

Electives

Creative Writing

Grade Level - 8th - 12th	Full Year	1 Credit (9th-12th)
--------------------------	-----------	---------------------

In this course, students will explore a range of creative writing genres, including fiction, poetry, creative nonfiction, drama, article writing, and blogging. Students will read writing that models technique and apply those techniques learned in their writing. In addition, students will develop an understanding of the writing process and its application to various projects. Students will evaluate the writings of peers, and be able to apply the evaluation criteria from peers to their own writing. Finally, students will not only produce a portfolio of finished written works, but will also publish chosen works in a literary magazine designed and published by the class.

Service Learning

Grade Level 9th -12th	Full Year	1 Credit
-----------------------	-----------	----------

Using the IPARD model (Investigate, Plan, Action, Reflection, Demonstration), students combine academic learning with plenty of hands-on meaningful, relevant community service. Students investigate their strengths and weaknesses, explore career options, learn strategies for success, and appreciate the value of civic responsibility. Students develop as leaders who take initiative, solve problems, work as a team, and demonstrate their abilities while helping others. Students maintain a reflection journal and routinely write about their experiences

before, during, and after service projects. Students also participate in other reading and writing assignments related to Service Learning, and create a reflection portfolio at the end of each semester.

Speech/Debate

Grade Level - 8th - 12th	Full Year	1 Credit (9th - 12th)
--------------------------	-----------	-----------------------

This course explores a wide variety and range of public speaking skills, including: Extemporaneous Speaking, Declamation, Original Oratory, Oral Interpretation (prose and poetry), and Storytelling at the novice level. Additionally, students are introduced to basic researching, argumentation, questioning, and rebuttal skills through a variety and range of debate disciplines, including: Congressional Debate, Public Forum Debate, and the basics of philosophy for Lincoln-Douglas Debate. Skill focus includes the development of techniques in diction, articulation, enunciation and projection. Students begin to analyze pieces of literature, create and deliver orations, write arguments, and evaluate performances. Students have the opportunity to participate in local and state level Speech and Debate (Forensic) competitions.

Student Council

Grade Level - 8th - 12th	Full Year	1 Credit
--------------------------	-----------	----------

Student council is an elective for students in grades 8-12. This course is designed to provide students with skills to become an effective leader and to provide knowledge to understand the role of students at EDUPRIZE. The course will include an overview of attitude, perseverance, respect, appreciation, gratitude, respect, responsibility, character, leadership, compassion, honesty, and tolerance. In addition, students will create and preserve a united student body; a body infused with pride and spirit which encompasses a diverse spectrum of students, faculty and community, by promoting involvement within EDUPRIZE.

World Cultures

Grade Level - 7th - 8th	Full Year	1 Credit
-------------------------	-----------	----------

World Language and Cultures Class is an introduction to one or more foreign cultures, with few language skills expected. There may be limited development of fluency with a program over one years that emphasizes limited language acquisition and cultural awareness.

Yearbook/Journalism

Grade Level - 8th - 12th	Full Year	1 Credit (9th-12th)
--------------------------	-----------	---------------------

Yearbook and Journalism students are taught the basic principles used to create a School Yearbook from general terminology to using the Lifetouch Website. Students are introduced to picture taking techniques, photo editing, coordinating color schemes, connecting themes, and

creating custom spreads as well as layouts. Students are also able to practice their public speaking skills through participating in class presentations, grade level team projects, and interviews. Major Assignments over the course include: Grade Level Meetings, The Schoolwide Interview Project, Superlative Voting, School Wide Announcements, Yearbook Promo Videos, and Cover & Mockup Spread Presentations. Yearbook Staff is also taught about Journalism and Photojournalism, with a specific focus in Newscasting. Students will learn about volume, tone, general etiquette, and reporting skills when partaking in the School Wide Announcements. Overall students are tasked with providing coverage for all school events, recording milestone memories from the school year, and reporting school wide news.

Students are required to attend weekly sporting events and also any school related celebrations. In addition, students are expected to be present at all Eagle Expos and assist with covering Dances, Graduation, and Seasonal Festivals.

The expectation of students before entering into Yearbook and Journalism is that students have general knowledge of how to use a camera, take pictures, and upload pictures onto a computer. Students also needs to have access to an email account and be able to promote the selling of school events. Although not required it is preferred that students have access to their own camera, memory card, and flash drive. Moreover, students are expected to be team players who work well with others, determined, open minded, hard working, and supportive; as being part of the Yearbook Staff is a team effort.
